

## **SECOM crime news**

In the month of Nov 08, Secom's response team and community police were able to prevent many crime cases and we highlight some of the successful ones. Secom community police together with Shah Alam police team managed to rescue 1 Indian girl who was abducted at knife point. The girl was unharmed and 3 male suspects were arrested by the police. In Melaka, our response team together with the Melaka police managed to detain 2 male intruders when they intruded into our Secom alarm response customer. Customer did not suffer any loss.

Economic slowdown increases crime rate. With the global meltdown and the slowing economy many companies start to retrench their staff and foreign workers are always the first group to be affected. The Home Ministry disclosed more than 30,000 foreign workers have been retrenched recently and these workers may pose a security risk to the country. Crime rate is expected to increase and we advise our clients to take strong counter measures to prevent such potential crime at their premises.

## **Cost savings on security**

With the business slowdown, sales and profit are expected to decrease. However, expenses tend to increase including cost of security. However, with proper security planning, risk management policy, insurance review and adjustment, company can still save some expenses on security. Guards can be reduced and substituted by electronic security such as alarm with monitoring and response, CCTV, access controls, and others. SECOM can assist customers to plan their security and achieve optimum protection with reasonable cost.

## **Christmas Special !!!**

Pepper spray is a derivative of Hot Cayenne pepper. The oils are extracted from the pepper using a high-pressure process. This process leaves you with the active ingredient in pepper spray known as OC or Oleoresin Capsicum. The pure pepper extract is then diluted with an inert ingredient that reduces the SHU or Scoville Heat Unit to get it down to a useable SHU for pepper spray. SHU is a unit of measurement that determines how hot a substance is.

You CANNOT carry pepper spray on board commercial aircraft. However you are able to place the pepper spray in your checked baggage. It all depends on countries allowing the import of pepper spray.

Always keep a safe distance between yourself and the intended assailant. Aim the nose of the spray at the eyes and facial region of the intended assailant, then release a 1 to 2 second burst of spray. Always keep your eyes on the intended assailant to determine if another spray is required. Once the threat is eliminated, seek help and call the police.

**For 60ml - RM 85.00 each**  
**For 100ml - RM 105.00 each**
