Johari: Stop retaining MyKad

Security personnel guarding buildings who insist on retaining the identity documents of visitors have been told to stop the practice immediately.

The Internal Security Ministry issued letters to licensed security firms on Sept 25, informing security guards that they were only allowed to write down the particulars of visitors instead of keeping the MyKad, driving licenses, passports or foreign ID.

Deputy Minister Datuk Seri Mohd Johari Baharum said security guards claimed they wanted to retain the documents because they needed information about visitors.

In the past, it was very difficult to keep an accurate record of visitors to your facilities. In many instances, the visitors may deposit their NRIC documents with the security or reception in exchange for a visitor pass. The visitor will collect back their documents and return the visitor pass at the end of the visit.

Many have questioned the validity of the company to keep the NRIC document of visitors as only Police and Immigration has the authority to do so. This resulted in many companies merely filling in some particulars of the visitors into a record book without verifying the authenticity of the identity of the visitor.

Many of the information is incomplete and in many cases illegible. Many company's visitors passes are not returned as a result.

The MyKAD now offers a solution to overcome this problem. As at the end of 2005, 16.8 millions (out of 18 million) Malaysian have either converted or applied for MyKAD. This translates to 93% which is high enough for us to consider implementing system leverage on the benefits of MyKAD for open-ended application.

Today, security to your facilities can be greater enhanced with the installation of a **Visitor Management System**. The visitors register themselves on arrival at the reception counter. A MyKAD reader retrieves the information of the visitors and information is kept on the database of the **Visitor Management System**. The MyKAD is returned to the visitors upon registration. If a visitor pass is now issued to the Visitor, the movement of the Visitor in the facilities can also be tracked.

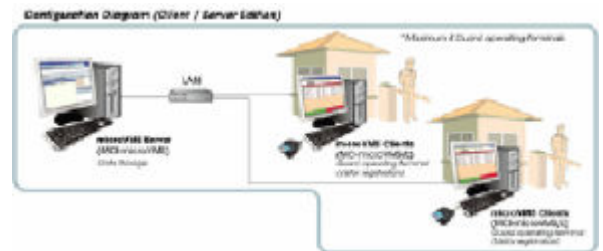

Computerized Visitor Management System which is specially designed to keep track of visitor coming and going out of the premises. With this system you will be able to expedite the visitor registration process, determine who is still inside of your facility and notify the system users once the banned visitor intends to sign in or sign out

This system is utilizes the latest technology which can enhance the security in the facility. Staff and visitor will feel more secured and being protected, it will create great first impression to visitor and enhance the corporate image.

Launching of Community Policing

The launching of Shah Alam Community Policing, a joint patrol between Polis Di Raja Malaysia Berhad and Secom (M) Sdn Bhd was held on the 15th December 2007 at Kelab Golf Sultan Abdul Aziz Shah, Shah Alam. The ceremony was graced by Dato' Khalid Bin Abu Bakar, Chief Police Officer of Selangor.

Secom has allocated 2 units of Proton Waja for this purpose. The patrolling will start off, focusing on the industrial areas in Shah Alam where there are high density of Secom's customers. Besides that, Secom has donated one Toyota Avanza to PDRM to be used as a mobile police beat for the Shah Alam area. Amongst the participants were senior police officers from Selangor Police head office and directors, management and staff of Secom (M) Sdn Bhd.
