

Providing a **GREATER GRIP** on your **SECURITY**

SECOM is the world's leading security service provider.

Our responsibilities begin, not end with the installation of security equipment.

You see, with SECOM, you do not just get security products to protect yourself with; for as long as you are a SECOM customer, you have our extensive expertise at your disposal, including 24 hours emergency assistance. You're assured of greater security, freedom and peace of mind.

All SECOM's proposed plans are FREE of charge, without any obligation and, are tailor-made to suit individual business needs.

Come and discover SECOM today.

SECOM Malaysia makes your world a safer place, by providing:

- SECOM Central Monitoring Services (CMS): Security Alarm Systems linked to a Central Monitoring Computer at our base, and Emergency Response Team backup
- Closed Circuit Televisions (CCTV) and Access Controls
- SECOM-trained local and Nepalese Security Guards
- SECOM Consultancy Services: SECOM Security Audit, an intelligent analysis which includes security and loss prevention recommendations
- Turnkey Projects—Design, supply, installation and maintenance of security systems (CCTV, Card Access, 24-hour Emergency Door System, Guard Tour Clocking System, Sensor Lights, etc)
- Building Integrated Security Systems

Closed Circuit Television (CCTV)

SECOM Closed Circuit Television (CCTV) is a video camera linked directly to a television monitor by a number of cables, and meant for private viewing only. Television monitors are usually located in a limited area, such as a store, an office building, or college campus.

Access Control

SECOM Access Control protects your premises from unauthorized entry, thus providing greater safety where you and your assets are concerned. It controls access into buildings and protected areas within buildings, and monitors who is in the premises, at any given time.

SECOM Guard Tour System

SECOM Guard Tour System is a form of enhanced guard patrol. It relies on patrolling guards using a handheld electronic recording device to provide on-the-spot security confirmation of the premise patrolled. This is done by passing the device over a location tag at a specific site on the premise, which reads the signal and then reports to the base, confirming the sites as secure.

SECOM Security Guards

In a business that is already notorious for its high turnover rates, SECOM Security Guards come highly-rated for their professionalism.
